

1	Author Guidelines for ECCV Submission	1
2	Anonymous ECCV submission	2
3	Paper ID ***	3
4	Abstract. The abstract should summarize the contents of the paper and should contain at least 70 and at most 300 words. It should be set in 9-point font size and should be inset 1.0 cm from the right and left margins. . . .	4
5		5
6		6
7		7
8	1 Introduction	8
9	Please follow the steps outlined below when submitting your manuscript.	9
10	1.1 Language	10
11	All manuscripts must be in English.	11
12	1.2 Paper length	12
13	The basic length is 12 pages, but up to two additional pages may be purchased in the final printed proceedings. This brings the <i>maximum</i> length for submission to 14 pages. Overlength papers will simply not be reviewed. This includes papers where the margins and formatting are deemed to have been significantly altered from those laid down by this style guide. The reason such papers will not be reviewed is that there is no provision for supervised revisions of manuscripts. The reviewing process cannot determine the suitability of the paper for presentation in 14 pages if it is reviewed in 16.	13

17		17
18		18
19		19
20		20
21	1.3 Dual submission	21
22	By submitting a manuscript to ECCV, the author(s) assert that it has not been previously published in substantially similar form. Furthermore, no paper which contains significant overlap with the contributions of this paper either has been or will be submitted during the ECCV 2012 review period to either a journal or a conference.	22
23		23
24		24
25		25
26		26
27	If there are any papers that may appear to the reviewers to violate this condition, then it is your responsibility to (1) cite these papers (preserving anonymity as described in section 2 of this example paper, (2) argue in the body of your paper why your ECCV paper is nontrivially different from these concurrent submissions, and (3) include anonymized versions of those papers in the supplemental material.	27
28		28

New format: Same text area, better margins for on-screen reading, better ruler. You can still print it out at the old size, just set “Paper scaling” to “None”. You can also print 2-up very compactly.

175 between text and figure should be about 8 mm, the distance between figure and 175
caption about 5 mm.

176 **Fig. 1.** One kernel at x_s (*dotted kernel*) or two kernels at x_i and x_j (*left and right*)
177 lead to the same summed estimate at x_s . This shows a figure consisting of different
178 types of lines. Elements of the figure described in the caption should be set in italics,
179 in parentheses, as shown in this sample caption. The last sentence of a figure caption
180 should generally end without a full stop

176 If possible (e.g. if you use L^AT_EX) please define figures as floating objects. 176
177 L^AT_EX users, please avoid using the location parameter “h” for “here”. If you 177
178 have to insert a pagebreak before a figure, please ensure that the previous page 178
179 is completely filled. 179
180

181 3.4 Formulas 181

182 Displayed equations or formulas are centered and set on a separate line (with an 182
183 extra line or halfline space above and below). Displayed expressions should be 183
184 numbered for reference. The numbers should be consecutive within each section 184
185 or within the contribution, with numbers enclosed in parentheses and set on the 185
186 right margin. For example, 186

$$187 \psi(u) = \int_0^T \left[\frac{1}{2} (A_0^{-1}u, u) + N^*(-u) \right] dt. \quad (1) \quad 187$$

187 Please punctuate a displayed equation in the same way as ordinary text but 187
188 with a small space before the end punctuation. 188

225 between text and figure should be about 8 mm, the distance between figure and 225
caption about 5 mm. 226

227 **Fig. 1.** One kernel at x_s (*dotted kernel*) or two kernels at x_i and x_j (*left and right*)
228 lead to the same summed estimate at x_s . This shows a figure consisting of different
229 types of lines. Elements of the figure described in the caption should be set in italics,
230 in parentheses, as shown in this sample caption. The last sentence of a figure caption
231 should generally end without a full stop 231
